Zaayan Javed

(512) 955-2833 | zaayan2003@gmail.com | linkedin.com/in/zaayan-javed | github.com/ZaayanJ

Technical Skills

Languages: Java, Python, JavaScript, C/C++, SQL (MySQL, PostgreSQL), HTML/CSS, R

Frameworks: Django, Flask, React, Node.js, Spring Boot, FastAPI, Streamlit

Libraries: TensorFlow, PyTorch, scikit-learn, Hugging Face, LangChain, pandas, NumPy, Matplotlib, ArcGIS

Developer Tools: Git, Docker, GitHub CLI, Terraform, Google Cloud (GCP), AWS, Firebase, Redis, n8n, REST APIs, Tableau

Experience

Cybersecurity & Data Engineering Intern **Jun. 2026 – Aug. 2026**

Charles Schwab *Austin, TX*

- Engineered a full-stack secure configuration management platform (Flask, Docker Desktop, GitHub CLI, Terraform, GCP) letting SMEs update baseline security configs via an intuitive UI with a full audit trail.
- Designed a GitHub-backed baseline storage system that persisted configurations as JSON, allowing baselines to be version-controlled and integrated into future pipeline components.
- Co-developed a proof-of-concept threat exposure assessment platform powered by an AI agent that continuously scanned cybersecurity blogs to surface emerging threats, functioning as an internal threat-intelligence news source for employees.
- Supported a patching exposure reduction initiative by sourcing critical documentation and assisting with survey data collection; tracked work in Jira and maintained technical documentation in Confluence.

Lead AI Automation Engineer **May 2025 – Sep. 2025**

FrontrowMD *Austin, TX*

- Built an end-to-end scraping pipeline in Python and n8n using Jina and Firecrawl APIs to extract full product catalogs from a single domain URL, eliminating manual setup.
- Automated ingestion of product data (price, cadence, nutritional facts) into a vector database, cutting partner onboarding time by 90%.
- Applied OCR and GPT-based image analysis to parse nutritional labels with 95% accuracy, ensuring reliable catalog coverage for partners.
- Integrated Airtop API for autonomous browsing and optimized MCP server connections, enabling real-time catalog coverage for partner companies.

Software Engineer Intern **Sep. 2024 – May 2025**

Klein Sports Performance *Austin, TX*

- Developed a RAG chatbot using LangChain + Llama 3.0, integrating 20+ research studies to deliver personalized fitness guidance and increase engagement by 30%.
- Built ML models and real-time support services with Firebase, Redis, and Ollama LLM, serving 4,000+ users and reducing onboarding time by 40%.
- Prototyped computer vision models with OpenCV and MediaPipe for form correction, enabling future in-app AI fitness coaching.

Data Integration Specialist **May 2023 – Apr. 2025**

Citgo *Austin, TX*

- Automated financial reporting and sales forecasting with Python/SQL, eliminating manual work and saving $5K annually.
- Integrated ERP datasets into dashboards, improving reconciliation accuracy by 12% and reducing reporting cycles by 40%.

Data Science Intern **May 2024 – Aug. 2024**

The Nature Conservancy *Austin, TX*

- Processed and analyzed 200+ geospatial datasets with ArcGIS Pro and Google Earth Engine, delivering BI-ready layers for conservation research.
- Automated land-use and habitat monitoring workflows with Python, reducing manual processing by 50%.

Projects and Organizations

Formance | React, FastAPI, PyTorch, MediaPipe, ViT **2025**

- Built a real-time squat form analysis system streaming webcam frames over WebSockets to a FastAPI backend, where MediaPipe pose landmarks feed EfficientNetV2-S and a ViT that classifies movement phase per frame.
- Trained PyTorch models scoring each rep 0–100 on depth, stability, and alignment at 94.7% peak validation accuracy; corrected a ~60% majority-class imbalance with class weighting.

AI & CS Club Leader | St. Edward's University **2022 – 2025**

- Organized 3+ hackathons and AI/engineering panels with industry partners, giving 100+ students hands-on exposure to real-world software and AI practices; mentored students on engineering projects.

Education

Bachelor of Science, Computer Information Science | St. Edward's University **Dec. 2025**
